Abstract—This paper provides the instructions for the preparation of papers for submission to ISIT 2009 and relevant style file that produced this page.

I. INTRODUCTION

The 2009 IEEE International Symposium on Information Theory will be held at COEX in Seoul, Korea, from Sunday June 28 through Friday July 3, 2009.

II. SUBMISSION AND REVIEW PROCESS

Papers will be reviewed on the basis of a manuscript of sufficient detail to permit reasonable evaluation. The manuscript should **not exceed five double-column pages, with single line spacing, main text font size no smaller than 10 points, and at least 3/4 inch margins (about 18 mm)**. The deadline for submission is **January 7, 2009**, with notification of decisions by **March 31, 2009**.

The deadline and five page limit will be strictly enforced. In view of the large number of submissions expected, multiple submissions by the same author will receive especially stringent scrutiny. All accepted papers will be allowed twenty minutes for presentation.

III. PROCEEDINGS

Accepted papers will be published in full (up to five pages in length) on CD-ROM. A hard-copy book of abstracts will also be distributed at the Symposium to serve as a guide to the sessions.

The deadline for the submission of the final camera-ready paper is **April 30, 2009**. Final manuscript guidelines will be made available after the notification of decisions.

IV. PREPARATION OF THE PAPER

Only electronic submissions in form of a Postscript (PS) or Portable Document Format (PDF) file will be accepted. Most authors will prepare their papers with \LaTeX . The \LaTeX style file (`IEEEtran.cls`) and the \LaTeX source (`isit_example.tex`) that produced this page may be downloaded from the ISIT 2009 web site (<http://www.isit2009.info>). Do not change the style file in any way. Authors using other means to prepare their manuscripts

should attempt to duplicate the style of this example as closely as possible.

The style of references, e.g., [1], equations, figures, tables, etc., should be the same as for the *IEEE Transactions on Information Theory*. The affiliation shown for authors should constitute a sufficient mailing address for persons who wish to write for more details about the paper.

V. ELECTRONIC SUBMISSION

The paper submission portal is EDAS:

<http://edas.info>

Check ISIT2009 website (<http://www.isit2009.info>) for relevant announcements.

VI. CONCLUSION

Never conclude a real information theoretic paper. If you have to, the conclusion goes here.

ACKNOWLEDGMENT

The authors would like to thank various sponsors for supporting their research.
